How to Scan a QR Code on most smart phones:

STEP 1

Open the Camera App on your phone.

STEP 2

Hold your device over a QR Code so that it's clearly visible within your smartphone's screen. You don't have to fill the entire screen, but make sure that you can see all four corners of the QR code in the app.

STEP 3

Finally, tap the pop-up banner. This will immediately send you to the video, website, or perform another action. It may take a few seconds on most devices.

Most phones have a built in QR Code reader, but some older devices may require an app to read QR codes. You can download these apps from the Apple App Store and Google Play store on your smart phone (Search for a "QR Code Reader").

Take note - You must have a smart phone to scan a QR code.
